To each and every one of you; look at the earth and know that you are supported, look at your hands and know that you are unique, and look at the stars and know that you are part of something greater than yourself.

Your Sun Sign Astrology Forecast for April 2016

Aries 20 March – 19 April

Make a wish! In fact, make a couple, or even three. Early this month is a perfect time to envisage your goals. When the vision and intention is made; the changes will happen to create what you want. There is one thing that you need to take care of, or to learn, before moving ahead so do it and let wishes come true.

Taurus 20 April – 20 May

Pay attention to any niggles with your health to stay fit and vital. What debts need to be paid? Who really needs to pay them? There will be consequences of risky actions. If it's somebody else's consequences then let them pay which means you are to use the old fashioned thing called "tough love"; both to yourself and to others.

Gemini 21 May – 20 June

Keep home life (the family tribe) and your social life (partners and friends) apart; for if they connect there will be tensions. Let yourself think of what you want to be doing, where to do it, with whom and how to do it, for this is a time to focus on the big picture. Don't sweat the small stuff.

Cancer 21 June – 21 July

You are being blocked from making decisions so take this hint from the universe and don't make any! Enjoy being recognized at work and in public. Authority figures will tend to look favorably upon you, so aim high and take full advantage of this opportunity to make minor changes; especially in regard to your job or public role.

Leo 22 July – 22 Aug

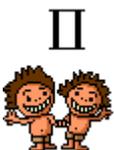

Yes you are gaining but you don't have as much money as you think you do, and it will not go as far as you want it to. The solution is to budget! Any travel, be it for work or pleasure, will bring surprises and reveal the need to adapt or change direction. Pay for good advice and use it.

Virgo 23 Aug – 22 Sep

Moving ahead, in fact any movement at all, would help but you are facing a stop sign so it becomes a restless month. Walk, talk, and do anything to keep moving because if you stay still you will pop! It's time to let go of thinking that you can fix anything; it's just an illusion.

Libra 23 Sep – 22 Oct

The past may seem like a long time ago but it always touches the present with every single decision you made back then. Stop and change your life by noticing what you used to believe in, and how you used to behave. Loved ones and the people close to you will help by showing how easy it is to make changes. Karmic garbage is removable.

Scorpio 23 Oct – 21 Nov

Pay attention to changes in the routine at work as it may disrupt your equilibrium. Long term plans will need more money than you expect. Ask yourself... What do I need to do to achieve my goals? Its only habitual behavior that needs to change; not the big stuff! Take care of yourself by eating, drinking and thinking healthily.

Sagittarius 22 Nov – 20 Dec

Why be your own worst enemy by sabotaging yourself? This is the time to stay the course and endure to achieve great success. You can do it! Be creative, make minor adjustments but maintain the direction. I know fresh new ideas are tantalizing; but they are distracting, so file them away for another day. Finish what you started and be brilliant.

Capricorn 21 Dec – 19 Jan

The focus this month is on home, parents and extended family. We inherit patterns of behavior along with genetic DNA. What would you like to do differently, or to do the same? Do you need to reach out to parents or to extended family? Do you want to move on, or to move house? Grab your opportunity to change?

Aquarius 20 Jan – 17 Feb

The down side this month is to remember to hold friends secrets sacred and even if the urge to gossip is strong (and it is), that you will never reveal their vulnerabilities. The positive side is that you have enhanced communication skills with a new understanding of the power of choosing the right words in the right place.

Pisces 18 Feb – 19 March

Loved ones are facing challenges and may complain more than usual. Keep the focus on you, as its time to think about your own inner worth, your possessions, and your financial situation. On one hand you have added value (it may mean compliments or a windfall) and on the other you could waste it (darn!). Give gratitude to the universe.

Did you know that the Sun moves into the 12 signs of the zodiac on *slightly* different dates each year. If you are born close to the border of two signs then you are on the cusp and you are a blend of the two sun signs. The dates here are the 2015 Sun Ingress dates for Australia. Source is Solar Fire from Esoteric Technologies.

Earth day April 22nd

This is the birthdate of the environmental movement. The date stems from an earlier day known as Arbor Day. This day was set aside in Nebraska USA in 1872 to plant trees, and then adopted by the environmental movement in the 1970's as protest day to raise awareness into our impact on the environment.

It's time to see what's happening for you.

In my work I will always use both Astrology and Palmistry. The Stars show your potential and your hands show how you grab **hold of life. Through them we look to your strengths, especially now and** to the future, and to see what to avoid, and what to enjoy.

Ancient Moon Gardening this April

Gazing out the window I can see the veggie patch where the last of the tomatoes are rapidly being turned into chutney. I have already made litres and litres of Passata, some with mushrooms, some with my eggplant and all with basil and herbs.

I am removing the sweet corn stalks (an easy task) and untangling the dead bean stalks that are firmly twisted around the wire bean arch (this task needs patience).

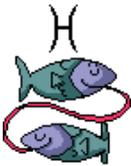

Finally I am astounded at the nooks and crannies that the butternut pumpkins have found amidst all the various plants in the garden. I have pumpkins galore!

The movement of the planets herald time when we feel mood changes, times we are galvanized to take action, and others times when we lack energy. There are shifts in feelings and energy levels at all New and Full Moons, when planets move into signs, or when there are connections (aspects) between planets, or when they turn retrograde or move direct again.

Pay attention to the days when these shifts happen and notice your feelings and energy levels. This understanding will enhance your experience of life. Enjoy the ride!

What's that in the sky this April?

To be amazed by the heavens, note that the sun rises in the east, sets in the west and the warmest side of the house is north. The darkest night is on the New Moon on the 7th April and the Full Moon is on the 22nd April.

For all you night owls

Jupiter is the highest, biggest and most awesome bright light in the heavens this month. The Moon joins him to say hello on the 18th April.

Mars and Saturn are rising in the east. They are difficult to see so let the moon be your guide as she joins them on the 25th and 26th April. The colors may also help as Saturn is creamy in colour and Mars is reddish especially in when you look out the side of your eye with peripheral vision and not direct vision. What may confuse you is that Mars is also close to reddish Antares in the eye of the Scorpion. Follow with your eye to see how his stinger sweeps high and curves in a right handed spiral. Upside down Orion and his sword belt, known as the Saucepan, are towards the west while the bright star to the left of Jupiter is Regulus, deep in the heart of Leo the magnificent Lion. We can see his heart but to see his outline requires lots of imagination! Turn around to see the Southern Cross upright and high above the pointer stars.

For all you early birds

This is the best time to see Mars, Antares, the Scorpion and Saturn as they are high overhead while Jupiter has now moved and disappeared into the western horizon. The Moon joins Mars and Saturn on the 25 and 26th. Turn around to see the Southern Cross on its side below the pointer stars.

Let yourself be awed!

A Super Moon this April

On April 7th we will have a New Moon Super Moon when the Moon will be at its closest point to us. We cannot see it as the Moon will be very close to the Sun but it will cause big big big tides!

Quote of the Month:

I was thinking about being conscious and what it means.....then I found this quote.....

"Until you make the unconscious conscious, it will direct your life and you will call it fate".

Carl

Jung

My question is ...how can we become conscious?

Then this quote found me.....

Instructions for living a life..

A Recipe for Increasing Happiness

Wake up and before you open your eyes, smile... yes move those endorphin producing facial muscles; and smile.

Say "thank you" and give gratitude to the whole universe.

Smile again ☺
