To each and every one of you; look at the earth and know that you are supported, look at your hands and know that you are unique, and look at the stars and know that you are part of something greater than yourself.

Your Sun Sign Astrology Forecast October 2016

Aries 20 March – 19 April

Tensions at work will affect your loved ones or close friends. Are you unloading your situation onto them or are they unloading theirs onto you? Emotions run high which may lead to the tensions tightening. Very soon it will be time to make changes, not necessarily big ones, as even a little change can make a vast improvement.

Taurus 20 April – 20 May

A pleasant social or relationship event will brighten up even the dullest day. On the down side you desire personal growth and freedom but this comes into conflict with duty and your sense of responsibility. Which wins? The only person you are really battling is yourself. Are you seeing the cup half full or half empty?

Gemini 21 May – 20 June

Various pushes and pulls are affecting your peace of mind. There is a nagging tension which needs release but there is something hidden behind the scenes that needs attention before taking action. Who, or what, has a vested interest or is intent on holding you back? Ask the right questions and you will find out; especially around mid-month.

Cancer 21 June – 21 July

The people around you are energized and need to seek challenges and to make a change. Are you holding them back with well-meaning advice? Remember that you cannot stop a landslide; so help, or get out of the way. This is also the perfect time to introduce new healthy habits which will have a long lasting beneficial effect.

Leo 22 July – 22 Aug

Long awaited news and information comes and some of it will not be pleasing. Acting on it sooner rather than later is a good idea. You are ready to dive head first into hard work but external rules and restrictions will bug you. Exercise is a good release valve for restless energies and also seek advice for any health concerns.

Virgo 23 Aug – 22 Sep

It's time to challenge yourself. You have either been expecting this or you have felt it coming. As they say..."no risk; no gain", but what if there was a price? Is it one you are prepared to pay? The gains could be magnificent; the cost small. Or vicer-versa. At end of the day you have to live with yourself.

Libra 23 Sep – 22 Oct

Be brilliant; for it's your time. Letting yourself grow tall will benefit you but upset unconscious family expectations. What do you gain by staying small? Why fight over things you don't understand? Release yourself from the chance of repeating your past behaviors; or repeating family behaviors. Your future habits, conducts and values can be different from your past ones.

Scorpio 23 Oct – 21 Nov

Early this month you are noticeable, charming and can attract others to your cause. It's due to Venus bringing a sparkle to your personality. You will likely need her help to ease you through the consequences of hasty decisions. Act in haste; repent at leisure! Also keep a lid on thoughtless words, as later this month conversations can suddenly turn into arguments.

Sagittarius 22 Nov – 20 Dec

II

Your visions are only limited by your sense of how worthy you believe yourself to be; and the necessary spare cash to achieve them. Let's be altruistic and focus on self-worth. Are you worthy of respect, of being treated well, of gaining your heart's desire? Inner abundance becomes outer abundance. Yes; you will have to work hard; but help is on its way.

Capricorn 21 Dec – 19 Jan

The New Moon rises on a whole new world if you want it. Your role, your image, your reputation, or your work takes a new direction. Are you ready to be different? If so; this will be marvelous. If you hate change then golly it will be a wild ride. Let go of the old and embrace the new!

Aquarius 20 Jan – 17 Feb

The search for justice has you acknowledging various injustices. Can all the wrongs be righted? We all have different morals. Can you list yours? Can you list those of another person? Can morals be changed? On a different tack... there is a tension filled surge building up from past (presumably) forgotten emotions. Let them be released in a caring and private place.

Pisces 18 Feb – 19 March

You must be carrying around a bubble of compassion that allows people to share their secrets with you; even strangers on a bus! They can also express their anger, not at you, but about their own dramas and hurts. This is a load that can feel heavy; so let each shower wash it away down the drain. It's their dramas..... not yours.

We do not go around the Sun in a perfect circle each year so the dates that the Sun appears to move into the signs can vary by up to one day.

If you are born close to the border of two signs, then you are on the cusp and you are a blend of the two sun signs. Source is Solar Fire from Esoteric Technologies.

There is a difference with me. I am not psychic or a medium. My background is in science (still do it today!) and I consider myself a map reader. Your Astrology chart and your hands are your maps of life.

If you have goals – let us use the maps to achieve them.

If you are stuck in a maze – let us use the maps to find a way out.

If you want direction – let us use the maps to find your direction points
..... just think of how useful this can be!

In my work I will always use both Astrology and Palmistry. The Stars show your potential and your hands show how you grab **hold of life. Through them we look to your strengths, especially now and** to the future, and to see what to avoid, and what to enjoy.

Halloween is on 31st October. This is said to have originated from the ancient Celtic harvest festival known as Samhain midway between the September Equinox and the December Solstice. Halloween is also known as All Hallows' Eve among the Christian community. It is the time that the border between this world and the "other" world narrows, and the dead are honored.

Super Moons!

On the 16th October we will have a Super Moon when the Moon will be at its closest point to us. I bet you thought that the Moon travelled in a perfect circle. Its doesn't.

Instead it moves in an oval shape. So sometimes it's further away and sometimes it's close. And when it's a Full Moon at the time of its closest approach we see it, especially on the horizon, as a little bigger.

There are two or three Super Moons each year and a Super Moon can also be a New Moon but as we don't see it; it's not so interesting.

People ask if a Super Moon heightens the weirdness that happens around a Full Moon but I have never heard of, nor have I found any ancient reference to super moons changing behavior other than that of a normal Full Moon. Did you know that the word lunatics came from the Lunar!

Birthday Greetings go out to

Ancient Moon Gardening

Gazing out the window I can see the veggie patch and this month it like a great big fluffy eiderdown with layers of compost, hay and straw all ready for planting. Soon my little seedlings.... Soon!

Oh.. I nearly forgot that the greens are going to seed, the gooseberries are budding nicely, the citrus are offering up armloads and the asparagus is springing up so quick that I daren't turn my back or it will be become too long and tough!

The movement of the planets herald time when we feel mood changes, times we are galvanized to take action, and others times when we lack energy. There are shifts in feelings and energy levels at all New and Full Moons, when planets move into signs, or when there are connections (aspects) between planets, or when they turn retrograde or move direct again.

Pay attention to the days when these shifts happen and notice your feelings and energy levels. This understanding will enhance your experience of life.

To further experience the rhythm of the Moon I suggest that you aim to start new projects and events at the New Moon, and bring them to full development approximately two weeks later at the Full Moon. From the Full Moon back to the New Moon is a time to look at the consequences, to reflect on what you achieved and to think about changes or new ideas that you will “birth” again at the New Moon.

Enjoy the ride!

What’s that in the sky this October?

To be amazed by the heavens, first get your bearings and note that the sun rises in the east, sets in the west and the warmest side of the house is north. ☺

The darkest night is on the New Moon on the 1st Oct and again on the 31st Oct. The brightest night is with the Full Moon on the 16th Oct.

For all you night owls

At the start of this month look west and watch as brilliant Venus appears just after dusk and follows the Sun into the horizon. A big stretched hand span higher is Saturn near reddish Aldebaran in the head of the Scorpion, and another big hand span higher is reddish Mars. Let the Moon be your guide as she joins with Venus on the 4th Oct, then with Saturn on the 6th and then Mars on the 8th.

As the month progresses, Venus moves quickly to join Saturn on the 29th October, thus goddess Venus kisses the old King Saturn under the baleful gaze (and within the sharp nippers) of the Scorpion. One wonders what stories the ancient would have made of that scenario! Who is seducing who in a dangerous places? ... ahhh just like the TV show, Days of Our Lives!

To be in a less dramatic environment, turn south to see the Southern Cross on its side with the two pointer stars high above them.

For all you early birds

No planets are visible early in the month but by the end of the month, Jupiter will begin to appear in the morning very bright on the horizon just before sunrise. He will be very visible next month but for this month he may be a tantalizing light on the low horizon as the dawn lights up the sky. If you have unobstructed views the Moon and Jupiter will make a beautiful sight on the 28th and 29th October.

The brightest star to the North is Aldebaran in the eye of Taurus the Bull and slightly lower to the left are the Pleiades, a glorious little cluster of jewel like stars. The Moon will be with them on the 19th October. Higher overhead is Orion's sword belt, known here as the Saucepan. The Yolngu people in Northern Australia don't see a Saucepan, they see three brothers and a canoe. The story is that they went fishing against the advice of their elders, caught nothing and in their hunger ate one of the scared animals of the tribe. The furious Sun Women created storm clouds which whirled the brothers into the sky where they remain to this day. The 3 brothers in their canoe appear at night during Monsoon season and what a great lesson this is....obey your elders, follow the rules and don't go fishing in canoes in Monsoon season!

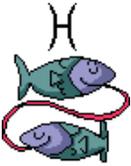

After that drama; turn south to see the Southern Cross lying on its side with the two pointer stars below and perhaps hidden by buildings, hills or big trees.

Let yourself be awed!

Gaining Peace

In times of stress or crisis

1. Only think about the next 5 minutes
2. Smile whenever you can. Force a smile if you have too, but use those facial muscles. A smile produces endorphins which is Mother Natures natural happy drug. So Smile!
3. Say yes to everything. Accept. To the situation, to the suffering, to any joy, to blessings both ordinary and extraordinary, to the pain. Say yes, no matter what.
4. Plan ahead 2 years 5 years and 10 years in the future. Plan it, imagine it, and build for it. See it in your mind's eye.

Quote of the Month:

"What gets rewarded gets repeated"

This is true for negative behaviors as well as positive ones. If one is only hugged when miserable then one will create misery in order to be hugged.

If one gets attention when misbehaving, then one will misbehave to get attention.

What are you rewarding in yourself, or in others? Are they all positive reinforcement?

Yes, these are hard question to ask oneself and we are allowed to forgive ourselves!
